You're both right. The data I have is compilation of everything START has reviewed so far. That includes the Cabot submissions, some of which are duplicates of documents we already had.

Rich, I compared the results cited in Dawn's note below with the data we had in the chart for the 1st 8 homes.

Ex. 5 - Deliberative

Den,

I think this is additional data that Cabot sent up and was placed on the FTP site. Right Steph?

I agree though, we need to discuss and go from there. No rushing ahead going on here. We will have a 9am data call tomorrow morning that Steph will be on (along with John Gilbert).

Thanks for the positive feedback. much appreciated.

Rich

Thanks, den.

PS to Rich - just want to say good job today to you and your team for jumping on the sample shipment issue. The fixes you have put into place sound good and we got positive feedback from HQ when I described the problem and our

corrective actions.

From a toxicological perspective, I reviewed the analytical data you sent earlier today for HW1 Ex. 5 - Personal Privacy HW2 Ex. 6 - Personal Privacy HW3 Ex. 6 - Personal Privacy and HW5 Ex. 5 - Personal Privacy in Dimock. In this regard, I have the following comments of to offer:

HW1

2-Methoxyethanol was reported at a concentration of 1300 ug/L in a sample collected from this location. Ex. 5 - Deliberative

Ex. 5 - Deliberative

Ex. 5 - Deliberative Note, however, that the toxicity criterion on which this conclusion is based is provisional. At a typical Superfund site, **Ex. 5 - Deliberative**

Ex. 5 - Deliberative

Methane was observed at 42,700 ug/L in a sample collected from the kitchen sink of this residence. Ex. 5 - Deliberative

Ex. 5 - Deliberative

HW2

Lithium was observed in a well sample at 33.1 ug/L, and in a kitchen sink sample at 31.7 ug/L. Ex. 5 - Deliberative

Ex. 5 - Deliberative

Ex. 5 - Deliberative

HW3

2-Methoxyethanol was detected a level of 1100 ug/L in two samples collected from this location. Ex. 5 - Deliberative

Ex. 5 - Deliberative

Ex. 5 - Deliberative

Ex. 5 - Deliberative

Ex. 5 - Deliberative

Ex. 5 - Deliberative

Ex. 5 - Deliberative

Iron was reported at up to 27,500 ug/L, Ex. 5 - Deliberative. While iron was detected in many samples from this location, none approached the maximum concentration cited in the previous sentence. Ex. 5 - Deliberative

Ex. 5 - Deliberative

Methane was observed in a sample collected from the well of this residence at 39,6000 ug/L. Ex. 5 - Deliberative

Ex. 5 - Deliberative

Ex. 5 - Deliberative

Up to 110,000 ug/L of sodium was detected in a well sample from this residence. Ex. 5 - Deliberative

Ex. 5 - Deliberative

HW5

Methane was observed in a sample collected from this residence at 42,7200 ug/L.

Ex. 5 - Deliberative**Ex. 5 - Deliberative**

Fecal coliform was detected at up to 250 cfu/100 mL in a gw well (former drinking well) for this residence.

Ex. 5 - Deliberative**Ex. 5 - Deliberative****Ex. 5 - Deliberative****Ex. 5 - Deliberative**

That's it, Stephanie. If you have any questions, please let me know. Thanks.
